Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in Paper dated 12/30/02 is acknowledged. The examiner agrees to withdraw the restriction requirement.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
3. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-7 and 16-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 16, it is not clear how the "anchor extending radially outward from the inner face". Should not "extending radially" be changed to – extending axially --?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuhlmann.

Regarding claims 1 and 16, Kuhlmann shows all of the limitations of the claimed invention.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-4, 7-11, 13, 15-19, 21, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peachee in view of Ptak.

Regarding claims 1 and 8, Peachee shows all of the limitations of the claimed invention except for the anchor and the fastener.

Ptak uses the anchor and the fastener for the purpose of mounting two components together.

Since Peachee and Ptak are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the anchor and the fastener as taught by Ptak for the purpose discussed above.

Regarding claims 2-4, 7, 9-11, 13, and 15, it is noted that Peachee and Ptak also show all of the limitations of the claimed invention.

Regarding claims 16-19, 21, and 23, the claimed method would be inherent and obvious since the prior art references meet the structural limitations of the claimed device.

9. Claims 5, 12, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peachee in view of Ptak as respectively applied to claims 4, 11, and 19 above, and further in view of Mizusawa.

Regarding claims 5, 12 and 20, the assembly of Peachee modified by Ptak shows all of the limitations of the claimed invention except for the anchor and the fastener having threads.

Mizusawa shows the anchor and the fastener having threads for the purpose of mounting two components together.

Since Peachee, Ptak, and Mizusawa are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the anchor and the fastener with threads as taught by Mizusawa for the purpose discussed above.

10. Claims 6, 14, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peachee in view of Ptak as respectively applied to claims 1, 8, and 16 above, and further in view of Wrobel.

Regarding claims 6, 14 and 22, the assembly of Peachee modified by Ptak shows all of the limitations of the claimed invention except for the anchor made of metal.

Wrobel shows the anchor made of metal for the purpose of mounting two components together.

Since Peachee, Ptak, and Wrobel are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the anchor made of metal as taught by Wrobel for the purpose discussed above.
